

# Terminal boxes with WAGO 221 Ex

Series 8118 made of moulded material

E3

- Compact, impact-resistant enclosure with increased safety (Ex e) type of protection
- Versions available with integrated metal bracket for optimised installation of metal cable glands
- Pre-installed fixing carrier for WAGO 221 Ex connection terminals
- Simple, fast and safe installation of electrical lines with spring lever technology
- A range of clamping cross-sections from 0.14 to 4 mm<sup>2</sup> can be installed for each connection clamping unit
- Use of core end sleeves not necessary for stranded or finely stranded conductors
- 2-, 3- and 5-way terminal blocks available as accessories

## MY R. STAHL 8118D

R. STAHL Series 8118 terminal boxes with WAGO 221 Ex connection terminals are made of glass fibre reinforced polyester resin. They are available in 2 design sizes and can be flexibly equipped with plastic or metal cable glands. They combine the advantages of the simple WAGO 221 connection terminal installation technology with proven R. STAHL enclosures with increased safety (Ex e) type of protection.

It is possible to connect conductors with different cross sections. Use only in connection with fixing carrier type no. 272625.
Components		
Note mounting carriers	A mounting foot must be installed between the fixing carriers in order to maintain the creepage distances and clearances for 440 V.	A mounting foot must be installed between the fixing carriers in order to maintain the creepage distances and clearances for 440 V.

Technical Data		
Variant	Ex e terminal box	Ex i terminal box
Components		
Note connection terminal	<p>The connection terminals must be fixed to the fixing carrier.            Maximum equipping per fixing carrier: (Max. ten clamping units per fixing carrier)            5 x 2-wire connection terminals (275 V),            4 x 2-wire connection terminals (440 V),            3 x 3-wire connection terminals (440 V),            2 x 5-wire connection terminals (440 V).            At a rated operational voltage &gt; 275 V, a slot between the each of the connection terminals must remain free. This means that the maximum equipping is reduced to 4 x 2-wire connection terminals per fixing carrier.            Number of fixing carriers:            max. 3 pieces for enclosure size 8118/2            max. 5 pieces for enclosure size 8118/3</p>	<p>The connection terminals must be fixed to the fixing carrier.
